PCN Number: P03900199

To: All SST39SF010A and SST39SF020A customers

SUBJECT: Product Change Notification – Transition to product revision J for SST39SF010A and SST39SF020A

Dear Valued Customer,

As a part of SST’s continued effort to deliver high-quality NOR flash products, we are announcing the availability of revision J (0.25um process node) for SST39SF010A and SST39SF020A. The following part numbers are affected:

<i>Device</i>	<i>Affected Part Number</i>
<i>SST39SF010A</i>	SST39SF010A-70-4C-PHE
	SST39SF010A-70-4C-NHE
	SST39SF010A-70-4I-NHE
	SST39SF010A-70-4C-WHE
	SST39SF010A-70-4I-WHE
<i>SST39SF020A</i>	SST39SF020A-70-4C-PHE
	SST39SF020A-70-4C-NHE
	SST39SF020A-70-4I-NHE
	SST39SF020A-70-4C-WHE
	SST39SF020A-70-4I-WHE

Revision J of SST39SF010A and SST39SF020A are compatible in form, fit and function to all existing revisions of each respective device and meet the same datasheet specifications. The revision of either device can be visually identified by looking at the last letter of the third row on the top side of the package. A revision J product shows the letter “J” following a 7-digit number and a dash; for example, xxxxxx-J, where x represents a number from 0 to 9.

Samples of the SST39SF010A and SST39SF020A revision J will be available by February 2010 and SST will begin volume shipments for both products by March 2010. In addition, the older revisions of SST39SF010A and SST39SF020A will be shipped to customers until inventory is exhausted or until August 31, 2010, whichever event occurs first. Beyond August 31, 2010 SST will only ship revision J of SST39SF010A and SST39SF020A. If you have any questions, or if this PCN plan presents significant difficulties for your business, please feel free to contact your local SST sales representative.

Sincerely,

Leon Wong
 Business Director
